	Juniper Virgiana	WEEPING	I discovered this plant growing wild between Mount Vernon & Vilonia in Faulkner county. The parent tree is awesome, approx 30' tall by 16 wide with a 10" trunk. This tree looked like a weeping willow from a distance, branches are just as wispy as a weeping willow. Juniper virgiana is our native cedar. has been difficult for us to propaqate #'s are very limited
